Talk to your patients about STIs

**Tell Everyone
to Screen & Test**

Sexual health is part of overall health, and STIs are on the rise.

Knowing your patients' sexual histories is essential to learning and understanding their health needs, and offering treatment if necessary.

- Assess.** Talk to your patients about their sexual health and history.
- Test.** Explain and offer STI testing.
- Treat.** Provide treatment as needed.

Visit stdccn.org/render/public for the FREE Clinical Consultation Service, or call CT DPH STD Control at **(860) 509-7920** with questions.
