

Connecticut Community Health Centers

Providing Hepatitis C Treatment

HCV/HIV Prevention Program – February 20, 2024

Hepatitis C is a liver infection caused by a virus that is spread through contact with blood from an infected person. It can cause liver damage and liver cancer.

Hepatitis C testing is now routine in CT, effective Oct 1, 2023.

Getting tested for hepatitis C is important, because treatments can cure most people with hepatitis C in 8 to 12 weeks with few side effects.

Inclusion in this directory does not confer any endorsement by the Connecticut Department of Public Health (CT DPH) nor does it establish credentialing or certification in a specialty.

*** Note: This list is subject to change. Please contact DPH HIV/HCV Prevention Program at HepCinfo.dph@ct.gov or at (860) 509-7801 if you have any questions.
